

.: NAC-115 .:

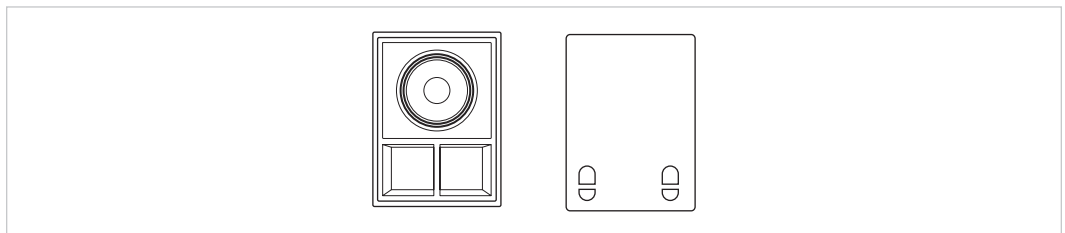

TECHNICAL SPECIFICATIONS

THEATRE SERIES

A very efficient system packing a very serious low frequency punch for its size. The NAC-115 puts out a tight, precise bass with virtually no audible distortion. A perfect match to the Theatre Series' single 12" and 15" top cabinets. This sub is the perfect touring companion for bands playing in small venues - especially for the perfectionist bass player. The transient snap and wide dynamics will put punch even into the shyest systems.

OUTLINE DRAWING

DESCRIPTIVE DATA

Frequency range	34 Hz - 134 Hz	Material/Cabinet	5/8" Birch 13 ply
Sensitivity (SPL 1W @ 1m)	100 dB	Finish	Urethane
Maximum SPL	133.8	Grille	Perforated metal
RMS (W)	600	Connections	-
Peak power (W)	1200	Height (In/cm)	30 1/2" / 77.47
Impedance (Ohms)	8 opt. 4	Width In/cm	21 1/2" / 54.61
Passive crossover	100 Hz	Depth (In/cm)	25 1/4" / 64.14
Dispersion (Horiz./Vert.)	N/A	Weight (lbs/Kg)	120 / 54.55
High frequencies	-	Fixing points	-
Low frequencies	1 x woofer 15"
