

.: NAC-118 .:

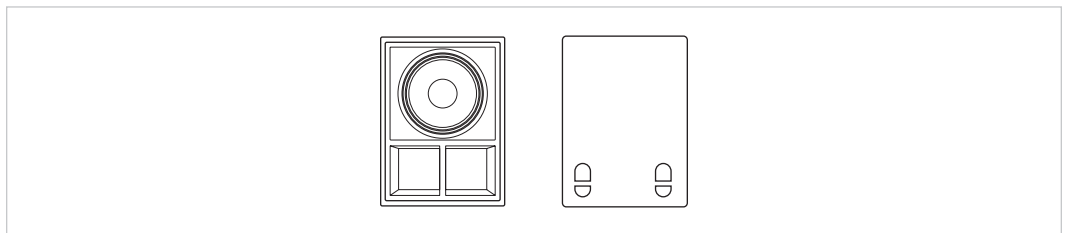

TECHNICAL SPECIFICATIONS

THEATRE SERIES

A unique sub woofer that uses a very powerful 18" LF driver to produce extended bass at almost unbelievable levels considering its size. This new design is very likely the best of its gender. The NAC-118 maintains high sensitivity and efficiency while pouring out deep, accurate bass with precise definition and transient characteristics. It is meant for the same uses as the NAC-115. The perfect choice when more level and more extended bass are desired and available space won't allow a double 15" or double 18" subwoofer.

OUTLINE DRAWING

DESCRIPTIVE DATA

Frequency range	45 Hz - 120 Hz	Material/Cabinet	5/8" Birch 13 ply
Sensitivity (SPL 1W @ 1m)	102 dB	Finish	Urethane
Maximum SPL	136.8	Grille	Perforated metal
RMS (W)	750	Connections	-
Peak power (W)	1500	Height (In/cm)	30 1/2" / 77.47
Impedance (Ohms)	8 opt. 4	Width In/cm	21 1/2" / 54.61
Passive crossover	100 Hz	Depth (In/cm)	25 1/4" / 64.14
Dispersion (Horiz./Vert.)	N/A	Weight (lbs/Kg)	125 / 56.82
High frequencies	-	Fixing points	-
Low frequencies	1 x woofer 18"
